HATS

No two men look alike. Is it reasonable, then, to suppose that the same style hat will be equally becoming to all men? We are inclined to think not. We go upon the supposition that the

GREATER THE VARIETY

of shapes, widths of brims, heights of crowns and colorings, the greater will be the satisfaction.

Accordingly, we present the greatest variety of Spring Hats to be seen in Pensacola. It embraces all shapes, colorings and proportions from the conservative shapes to the latest in young men's snappy styles.

Prices, 50c to \$3.50.

A SUN BATH.

It is a Potent Factor in the Cure of Any Disease.

There is no disinfectant made by man that can compare with the sun's rays in effectiveness.

A sun bath is a most potent factor in the cure of any disease. After one's skin becomes accustomed to the direct rays of the sun one may lie in the sun-shine for hours at a time with great benefit, but at first the exposure should be of only a few minutes' duration at one time. These short periods, however, may be repeated several times a day. The best results are obtained by exposing the bare skin of the whole body (except the head) to the direct rays of the sun. Consequently a cot placed in the bow window of an upper chamber is the ideal place for a sun bath, provided that the air in the chamber is absolutely fresh and pure.

To sit on the porch in the sun is very beneficial, even if one must be so warmly wrapped up as to make it difficult for the sun's rays to penetrate to the skin.

To lie on the grass in the sun is better still—on the grass with only a blanket between the invalid and the healing powers of mother earth.

The patient's head should not be exposed to the direct rays of the sun in any case, and a sun bath should be followed by a cool sponge bath when possible—Maxwell's Talisman.

FRIDAY

Mayor Bliss Sets Apart that Day
For Fumigation of All Houses
and Stores By Residents
of City.

Mayor Bliss has issued the following notice:

To the Public:

While there is no epidemic of yellow fever in Pensacola, and while there is no probability of any epidemic, yet a serious condition confronts us.

If the people co-operate with the constituted health authorities, the fever will in all probability be stamped out and the normal business conditions be resumed in October.

If, on the other hand, people persist in disregarding the authorities and persist in giving free way to the yellow fever mosquito, then we shall probably have fever until December.

Now what do the citizens of Pensacola want?

What good can possibly result from opposing the health authorities? What harm can possibly be done by giving them your assistance?

A man who persists in setting up his opposition to science and law is a dangerous element in the community.

A man who obeys science and law is a patriot.

To which class do you belong? I call upon all citizens to first protect their own homes by killing all the mosquitoes and to continue the protection by screening as far as possible.

I further call upon the entire city to set apart Friday afternoon to close all stores, offices and places of business and all buildings, and to make them all as air tight as practicable and to then thoroughly fumigate them with sulphur.

All places should be fumigated as early and as soon as possible, but I set apart Friday afternoon as a time for concerted action.

To kill the mosquitoes means a resumption of business and a return to normal prosperity, to say nothing of eradicating the fever.

Let citizens unite in the good work.

CHAS. H. BLISS, Mayor.

LAZ JACOBY.

THE TOOTHBRUSH TREE.

An Accommodating Little Plant That Grows Only in Jamaica.

The toothbrush was brown, brown alike in handle and bristles, and its shape was uncouth.

"It is a homestead article," said its owner. "It grew on a little tree, a toothbrush tree. They have a toothbrush tree in Jamaica. As we go out and pluck a peach or a pear, so the Jamaican goes out and plucks a toothbrush."

"Literally, of course, he doesn't pluck a toothbrush. He cuts off a twig and ravel out one end into bristles. The wood, you see, is somewhat spongy, like slippery elm, and it has an aromatic flavor like dentifrice. It makes a toothbrush of good quality."

"The bark of this singular tree is often ground into tooth powder. Here is a box of the ground bark. It smells good, doesn't it? Though it makes no lather, it keeps the teeth very white."

"Jamaica is undoubtedly the only country in the world where you can go out and pluck not only your toothbrush, but your dentifrice, from a tree."—Chicago Chronicle.

Briefed In Wax.

King Edward I of England died July 7, 1307, and 400 years later the English Society of Antiquarians opened his tomb in order to find out if he really had been buried in wax, as the legend ran. The chronicler of the time remarks, "To their great astonishment, they found the royal corpse to appear as represented by the historian." Although "the skull appeared bare, the face and hands seemed perfectly entire." The king was found to be six feet two inches in length, thus fully justifying his nickname of Longshanks.

Wanted Her Money's Worth.

Mme. Parvenu—Can I get you and your orchestra to play at my soiree next Thursday night?

Orchestra Leader—Certainly.

Mme. Parvenu—Well, you may consider yourself engaged. But I want to make arrangements to hire you by the piece. Do you understand? The last time I engaged you by the hour, and your men took advantage of it and played slow, soft things most of the time.

A Raft at Sea.

Mrs. Chugwater—This paper says the passengers escaped on a raft. How could they make a raft at sea? Mr. Chugwater—They could use the ship's log, couldn't they? Why don't you use your own reasoning faculties once in a while?—Chicago Tribune.

FEEL IMPENDING DOOM.

The feeling of impending doom in the minds of many victims of Bright's disease and diabetes has been changed to thankfulness by the benefit derived from taking Foley's Kidney Cure. It will cure incipient Bright's diabetes and even in the worst cases gives comfort and relief. Slight disorders are cured in a few days. "I had diabetes in its worst form," writes Marion Lee of Dunreath, Ind. "I tried eight physicians with relief. Only three bottles of Foley's Kidney Cure made me a well man." W. A. D'Alemberte, Druggist and Apothecary.

The Madding Crowd.

One thing that annoys and humiliates a western man in New York city is the way in which he is herded with the crowd. Out west a man is an individual. He feels that he is somebody, a responsible citizen, a factor in the community, a person more or less worth while, entitled to a certain amount of respect merely as a man and regardless of wealth or social position or political power. But in New York, unless one is somebody very important, he is nobody at all. He is a mere unit in the mob, of no more moment than one out in a hill.—San Francisco Bulletin.

Scarlet Fever.

An English physician declares that it is better to keep scarlet fever patients at home, where the germs die out gradually in the fresh air, than to send them to a hospital, where they are in the midst of dozens of other cases in all stages of the disease. On their return to school the germs are called into activity by the foul air in the room, and the disease is spread to others by coughing, etc.

How to Judge Beer

SOLID, CREAMY FOAM

An infallible indication of body, age and excellence of brewing material.

A solid, creamy foam is the invariable indication of body, age and excellence of brewing material in beer. Unless the best grades of barley and hops, selected with extreme care, are used in sufficient quantity, brewed so as to give the beer the proper strength and body, and afterward the beer is thoroughly ripened and aged, it cannot show the solid, creamy foam always found in the famous
